

Hover Lite

Sit to stand at the push of a button.

Offering similar features to 2016 Best of Neocon winner Hover, Hover Lite's simplified design allows for easier installation at a lower price point.

Power and data cables become easily managed and neatly tucked away inside the beam, with 2-1/2" grommets on both ends and access to power from underneath.

The latest innovation in sit to stand desk solutions.

Simpler, easier to use and comprised of a lighter footprint, Hover Lite is the ideal budget-conscious solution when compared to the current sit/stand desk alternatives in the industry.

Hover Lite beam options allow for the horizontal routing of power, voice, data and IT/AV wiring from infeed source to each individual work station, keeping you connected and recharged.

**Multiple solutions.
Endless possibilities.**

With a variety of fabric and finish combinations, Hover Lite is a versatile solution that complements any space. And - with a lower price point, its the perfect choice for the budget-conscious.
