PRODUCT SPECIFICATIONS

Veneers

Veneer on all exposed surfaces is #1 select American Black Walnut or Cherry. Outside surface veneers are bookmatched to provide proper grain consistency. Drawer fronts are vertical grain and matched in selected sets to insure proper veneer balance. Inside faces of end panels and back panels are random matched.

Wood Veneer Tops

Tops are 1 3/16" thick, 3-ply construction with shaped edge on all four sides.

End Panels

End panels are 1" thick, 3-ply construction with veneer band on vertical edges and a black PVC band along the top edge. Wing end panels feature a solid lumber band on the bottom edge of the panel to prevent glide tear out.

Modesty Panels

Modesty panels are 3/4" thick, 3-ply construction with bookmatched veneer on approach side.

Drawers

Drawer sides and backs are 7/16" thick. Drawer fronts are 3-ply construction, 3/4" thick. Drawer bottoms are of 3-ply hardwood construction. Drawers are assembled with dovetail construction in all four corners of the drawer box. Fronts are securely mounted onto the drawer box. Drawer pulls must be specified on pedestals. There are five styles of pulls with three finish options available.

Hardware

Drawer suspensions - all drawer suspensions are "A" grade steel ball bearing suspensions. Suspensions are zinc plated and feature cushioned in and out stops. All file drawers have 100% opening.

Locking

Pedestals are pedestal locking keyed randomly. Three and four drawer lateral files are central locking with anti-tip mechanisms installed. Locking on some storage units may be optional.

Electrical Accessories

Wire Management - Black rectangular grommets are standard on return, bridge, and corner tops. Additional grommets are optional in a variety of locations.

Chassis Construction

Construction technique is mortise and tenon, groove and tenon, heavily glue blocked for maximum strength.

Filing

File drawers use an easily adjustable filing rail system which can be positioned to accommodate front to back or side to side letter or legal filing.

Finish

All exposed surfaces are finished with a UV inhibitor catalyzed varnish finish to ensure maximum durability, chemical resistance, color retention and clarity. All exterior surfaces are finished in the following multi-step sequence: sap stain, NGR stain, wash coat, wash coat sand, filler spray, filler wipe, sealer spray, sealer sand, varnish spray, varnish sand, varnish spray. Moisture content for all wooden parts is between 5 - 9% prior to sealing. Drawer interiors and exteriors are UV prefinished with sealer, sealer sand, and varnished. Custom finish matches are available, contact customer service for request.
